

**ACTION PLAN FOR ENHANCING THE TEXAS STATE  
BULLION DEPOSITORY**

**PLUS BULLION DEPOSITORIES IN OTHER U.S. &  
MEXICAN STATES & CANADIAN PROVINCES**

**Presented December 2016 by Charles Savoie**

***Please choose at least ten issues and contact your state  
legislators for action!***

**“The great misfortune is that a notion obtains with those in power that the people require more governing than is necessary. To govern well is a great science, but no country is ever improved by too much governing.”**

**---Sam Houston (1793-1863), a hero of the War of 1812 who became number one military, monetary and political protégé of General and President Andrew Jackson; Member of the House of Representatives from Tennessee (1823-1827); 7<sup>th</sup> Governor of Tennessee (1827-1829); military leader of Texas forces in the Battle of San Jacinto in 1836, defeating the invading Army of Mexico, with a fatality ratio of 59 to 1 in favor of the**

**Texas forces and taking 730 enemy prisoners; first President (1836-1838) of the Republic of Texas, winning by 79% of the votes; became 3<sup>rd</sup> President (1841-1844) of the Republic of Texas, cleaning up the monetary mess left by paper money freak Mirabeau B. Lamar; member of Texas House of Representatives (1839-1841); Houston was the most prominent leader in Texas for joining the United States; extremely prominent leader in affairs pertaining to the Mexican-American War of 1846-1848 (caused by the United States annexing Texas), which resulted in the addition of more than 900,000 square miles to United States territory; U.S. Senator from Texas (1846 to spring 1847; again, fall 1847 to 1859); Governor of the State of Texas (1859-1861); only person to have been Governor of two States and President of a separate Republic! America's fourth largest city bears his name and a 67 foot tall statue in his honor stands by the highway at Huntsville, Texas! The San Jacinto Monument, commemorating his victory over the Mexican Army, is the tallest obelisk in America at 15 feet higher than the Washington Monument (570 versus 555 feet). A large amount of gold and silver was dispossessed from the Mexican Army at San Jacinto,**

**which went to Houston's soldiers with some set aside to start a Texas Navy. When Houston joined Andrew Jackson's command in 1812 he was paid one silver dollar and at the victorious close of the war received 500 more! Houston would have been enthusiastic about a Texas State Bullion Depository---provided that all its aspects were respectful of free markets! The Century Magazine, August 1884, page 503 stated that after his awesome victory at the Battle of San Jacinto, "GENERAL HOUSTON BECAME AT ONCE THE LEADING MAN IN TEXAS, UNIVERSAL APPLAUSE FOLLOWING HIM" and on page 505 Houston was identified as a "coin patriot," meaning a hard gold and silver money man---**

**During Houston's second Presidency of the Republic of Texas, the average annual government expenses were reduced from \$1,618,405 down to \$170,361! Today State of Texas debt per capita surpasses \$10,000! Texas has not seen Houston's equal since!**

**<http://www.usdebtclock.org/state-debt-clocks/state-of-texas-debt-clock.html>**

**Personal Sovereignty Agenda for Texans!**

**1) Abolish all civil asset forfeiture. No taking of any aspect of a person's net worth absent a criminal felony conviction. We aren't referring to misdemeanor fines. Why should anyone deposit precious metals in the State Bullion entity if their metal can be stripped from them without a criminal conviction? Until CAF is eliminated in Texas there is a limitation on motivation for depositors!**

**2) Relax suspicions on cash and liberalize the use thereof; it will cause more good than harm. People deserve some privacy. Why should citizens be treated as likely criminals for depositing or withdrawing cash from banks, when large businesses like Wal-Mart and numerous others freely deal in large cash volumes? Texas has a currency printing plant. If cash is so evil, why is the Federal government printing it?**

**3) The rhetoric and practice of the so-called War on Drugs must be toned down. Police violence in the form of overreaction in use of force must be lessened. Penalties for nonviolent criminal offenders must be reduced.**

4) Scrap by overriding state law all obviously confiscatory municipal fines for city code violations. Abolish petty, nitpicking code violations and bar cities from allowing only short, sudden notice to residents to come up to code. On vehicles used by code inspectors, require a painted notice, "I am your servant not your master." Make code inspectors pass an attitude test for courtesy to the public. Suppose someone wanted to buy bullion and deposit into the State Depository, but couldn't do so, because a tyrannical municipal authority robbed him/her blind for petty code violations, or seized their home due to inability to pay draconian fines? Cities with high bond indebtedness must be blocked by State law from despotically seizing funds from residents. This is a serious issue and occurs in all States!

5) Police officers, when psychologically unfit, can and do become serious dangers to the public. Automobiles are required to pass annual State inspection for safety purposes. Unsafe autos can cause injury and death. All law enforcement personnel must undergo annual psychological evaluation to ascertain fitness and

**continued fitness for this high power occupation. If they can't tolerate having uneventful shifts, they don't belong. Police who are fired from any department must automatically forfeit their state peace officer's license/certification and also be barred from security guard employment. Denying them a carry permit at that point should be considered.**

**6) Require all high school administrators of public and private schools maintain database records of students of both genders who acquire a reputation for being hallway toughs. Football players with three or more penalties for unnecessary roughness must be flagged in the database. On application to police academy or private security guard occupation, those flagged must be 100% rejected without possibility of appeal, including court appeal. Scholastic administrators must be completely immune in such decisions.**

**7) Motorists must carry liability insurance. Police must also be required to carry personal liability insurance in event of serious mistreatment of the public. Doctors carry medical liability insurance. There is no just basis to soak the public when judgments are rendered against**

law enforcement personnel, nor any basis to make others carry their own liability insurance while they in effect get to be an unreasonably protected class of scofflaws! Everyone must be accountable for their actions and no group must be preferentially excluded!

8) Texas residents are seriously damaged by unreasonable insulation from consumer lawsuits relating to vaccine injuries inflicted on children by pharmaceutical giants, abetted by the Food and Drug Administration and by bought-off members of Congress. Full product liability must be restored so citizens rights in the courts against Pharma aren't compromised. People with crippling medical costs can't buy bullion and store it in the new State Depository. No Texas school children should face any mandatory vaccinations and older pets should be allowed rabies vaccine exemptions. <http://www.texansforvaccinechoice.com/>

# TEXANS for Vaccine Choice

9) In May 2011 there was an [attempt](#) made by the Texas Legislature to prevent abuse of Texans by Transportation Security Administration agents in regard to fondling and invasive touching, calling for up to one year of jail time for TSA employees if they commit such offenses. The Federal government asserted the Supremacy Clause of the Constitution (illegitimately of course) and threatened to cancel flights out of Texas if Texas passed the legislation (Texas HB 1937). The legislation stalled in the Texas Senate. This battle must be revived and before full action is taken, Texas must enlist cooperation of at least nine other States to take the same action. With at least ten States unified, the Federal government would have to back down. In the 2011 incident, Republican State Senator Dan Patrick

indicated he lost the votes necessary because lieutenant governor David Dewhurst accepted the Federal ultimatum. Patrick is now lieutenant governor. Dewhurst is an “ex” member of the Council on Foreign Relations and is [also](#) “ex” CIA.

*The State of Texas Legislature and Governor must issue declarations promoting the following objectives---*

10) The Federal Government must conduct, with State officials such as comptrollers, participating in an unhindered audit of Fort Knox gold.

11) The Federal Government must conduct, with State officials such as comptrollers, participating in an unhindered audit of the Federal Reserve System, especially the New York Federal Reserve Bank and the District of Columbia headquarters.

12) The Federal Government, besides being enjoined against forcibly removing precious metals, jewelry, diamonds and other valuables from the Texas State Bullion Depository, must also be enjoined against telling Texans in all 254 counties owning precious metals

**outside the State Bullion Depository that they must remit their metals to the Federal Government.**

**13) No metals dealers anywhere in the State of Texas must be told by Federal authorities that metals they purchase from the public and business must remit said metals to any agency of the Federal government, Treasury, Defense, Homeland Security or Interior, or to any new Federal agency or to any Federal Reserve branch bank.**

**14) Texas government must be friendly towards all citizens and businesses accepting and making payments directly in precious metals. There must be no pressure brought to bear to compel persons and businesses to deposit their physical metals into the State Bullion Depository.**

**15) Texas officials must warn the Postal Service and all other shipping companies to not interfere in intrastate nor interstate commerce to and from Texas regarding shipments of precious metals.**

**16) Texas must warn the banking industry and the Federal government to not compel Texas residents to**

mandatory participation in any bank “bail-ins.” In the event of “bail-ins,” the banks buildings, land ownings and other assets including equipment, must be immediately seized, and all credit card and mortgage debt owed to such banks by Texas residents must be deemed legally expunged.

“If I’d have thought about it I’d have brought a loaded mortgage and shot him with that!”  
actor James Coburn in  
“Have Gun Will [Travel](#),” December 26, 1959

17) UTIMCO board and management insisting that Texas gold must remain linked to the COMEX system must be ousted and replaced by persons looking out for State interests rather than for Federal Reserve interests.

18) University of Texas at Austin Chancellor William McRaven is on [record](#) opposing campus carry, and against UTIMCO gold being de-linked from the COMEX. [Campus Carry](#) gun laws are in effect in Texas, signed by former Governor Rick Perry and supported by current Governor Greg Abbott. Chancellor McRaven must be ousted from all posts held in connection to the UT

**System and UTIMCO as his views on gun rights and gold clash with the best interests of the State of Texas and its citizens.**

**19) HSBC Bank New York must be notified to immediately deliver all UTIMCO gold to Texas state officials including the State Comptroller, regardless of whether the Texas Bullion Depository is completed. The gold can be stored in a secure vault in Austin.**

**20) Outside firms offering to store Texas gold outside of Texas must be 100% rebuffed. If they're involved with management of a Bullion Depository in Texas, they must at all times be tightly monitored so nothing exits the Depository absent full consent of any and all depository agents and the depositors they serve.**

**21) The Silver Users Association must be blocked from having any input into any State bullion depository, in Texas or any other States. It recently changed its name to Precious Metals Association of North America as a public relations ploy; in the same sense that the Church of England in America altered its name to Episcopal Church during the Revolutionary War so as to take less heat! The World Gold Council must have no input into any State Bullion Depository.**

**22) The State of Texas must shield all its residents, whether depositors in the State Bullion entity or not, from any Federal seizure, nationalization, confiscation or eminent domain in taking precious metals, under declaration of wartime or other national emergency, whether the reasons cited be monetary or military emergency.**

**23) Texas officials must warn the Federal government, including the Treasury and the State Department, against obstructing U.S. citizens in other states, and foreigners, from depositing precious metals into the Texas State Bullion Depository. Capital controls must not be used to block foreigners from depositing gold with Texas.**

**24) Troubled pension funds should be allowed to liquidate up to their entire remaining assets and reinvest in hard precious metals.**

**25) Texas officials should form a liaison committee with counterparts in other States including Mexico and Canadian provinces to compare notes in the formation and operation of bullion depositories and encourage the regional Federal Reserve Banks to permanently shut down.**

**26) Texas officials must hold a press conference, (reluctantly covered by the New York media conglomerates) that the United States Department of Defense should go into the open market and start sourcing .999 silver for a renewed strategic military reserve/stockpile. These acquisitions must be made by**

**free market means only and absent any coercive threats by the Federal government towards silver holders and/or mine operators, and it must be by competitive bid only; not in any way like the bogus Treasury silver “auctions” (giveaways) to the Silver Users Association (1967-1970) managed by the General Services Administration.**

**27) Texas State government officials must form liaisons to counterparts in the other 49 States and insist that neither Congress nor the President take us into war absent two-thirds consensus of the States, not just the Senate.**

**28) The Seventeenth Amendment, the direct election of Senators, must be scrapped, and again return to State legislatures the power to select Senators to serve in the national Congress. The Seventeenth Amendment seriously weakened the Tenth Amendment which covers states rights. Direct election of two Senators per State allowed Wall Streeters to seize working control over the national Senate. The 17<sup>th</sup> Amendment passed by a majority of States by April 1913, after which the Federal Reserve Act of 1913 was made possible in**

**December 1913! The account of Pilgrims Society member Alden W. Freeman, son of a treasurer of Standard Oil Company, and how he spearheaded the drive for the perverse 17<sup>th</sup> Amendment, is free access at [www.silvermarketnews.com/articles/SilverPriceFixing\\_Savoie022415.pdf](http://www.silvermarketnews.com/articles/SilverPriceFixing_Savoie022415.pdf)**

**29) A declaration in support of competing currencies is needed.**

**30) No Federal or State VAT (value added tax) on any precious metals; gold, silver, platinum, palladium, rhodium bullion or coin.**

**31) Surplus State funds should be held in precious metal ingots, silver especially if the price ratio is more than 20 ounces of silver per single gold ounce. No disposals of silver to any current or former Silver Users Association members unless they are high price bidders.**

**32) End all capital gains taxes on precious metals! This is a must for boosting them as competing currencies.**

**33) Penalties for burglary and robbery of precious metals should be stiffened.**

**34) Texas should oppose any move to censor free speech on the Internet.**

**35) No so-called “sanctuary cities” in Texas offering safe haven to violent illegal aliens.**

**36) Begin to seriously reduce State government debt!**

**37) No forced Federal or State microchipping of Americans.**

**38) Members of openly globalist groups should be barred from becoming elected and/or appointed officials of the State of Texas, including the World Affairs Council of Dallas/Fort Worth, the San Antonio and Austin World Affairs Council, the Council on Foreign Relations, Committees on Foreign Relations, et al.**

**39) Texas Legislature and Governor should declare against any North American Union objectives as these are detrimental to Texas as a distinct political entity. Crown loyalist, Pilgrims Society member Andrew Carnegie conceived the North American Union idea, and Pilgrims Society member John M. Cates Jr., who was president of the Center for Inter-American Relations,**

stated on page 558, *Who's Who in America, 1978-1979*---

**"I also believe strongly in international cooperation and the stark necessity of a one world society without national borders in the future."**

Cates was a director of the Bolivian Society and the Pan American Society, the latter behind South American central banking. He held decorations from Venezuela and Panama. He was involved with the Organization of American States, the United Nations, the State Department, and was on the executive committee of Wolf's Head Society of Yale and a member of Yale University Council.

**40) The Pilgrims Society New York must be investigated and forced to post rosters to public view, inasmuch as they are the apex source for monetary subversion afflicting America and have dragged us into two British planned and sponsored World Wars to tip the balance in favor of their Empire ("Commonwealth"). What is the USA President doing in bed with this nearly unknown organization linking us to Old World tyranny and monetary subversion? Page 141 of the short run**

**2003 book, “The Pilgrims of the United States” features this---**

*A letter from President Richard Nixon, accepting the invitation to become honorary president of the Pilgrims of the United States. In 1953 President Eisenhower was the first American President to be so invited, and the tradition continued into the 1980s. President Reagan was the last honorary president of the Pilgrims, but the President of the United States continues to be elected an honorary member.*

**After Nixon joined this hellish thing, he closed the gold window at the Treasury Department to foreigners and through his Cost of Living Council, price capped domestically mined silver at \$1.61 the ounce! Are you getting some clues as to why they want to corrupt the Texas State Bullion Depository? On April 14, 1972, the Cost of Living Council denied a request to exempt silver from price controls. According to the Wall Street Journal of April 14, 1972 (page 3)--**

**“American Smelting & Refining Co. requested silver and zinc exceptions, but the council ruled that removal of price controls could lead to price increases with more than a minimum inflationary impact.”**

**Fast forward 44 and a half years, and on December 8, 2016, this [announcement](#) surfaced---**

**“Her Majesty the Queen as represented by Alberta Investment Management Corp acquired a new stake in shares of Silver Standard Resources valued at about \$1,957,000.”**

**The Royal family sponsors The Pilgrims Society in London and New York, and the largest SSRI shareholding entity has been Pilgrims Society represented since at least 1974---as of September 2016, the Van Eck interests held 34.08% of SSRI shares outstanding---**

**The Pilgrims New York 1974 leaked roster, page 23---**

**Van Eck, Jr., John C.**

***The fact that those holders are there guarantees a huge bull market and not much prospect of Federal nationalization of mining properties!***

**Physical metal may actually be less secure as silver was nationalized at 50.01 cents the ounce by Executive Order 6814 on August 9, 1934 while mining shares weren't taken, silver prices to miners were Federally capped at 64.64 cents the ounce. Capping prices miners receive for silver, on an official basis, is not so easy to do today because America can't produce enough silver to meet all its demands. Texas and other States must protect their residents from Federal demands to remit any or all precious metals to the D.C. government. They refuse to allow a real Fort Knox audit for 64 years and they dumped the former 165 million ounce silver reserve for defense. Private citizens aren't at fault for this sickening mismanagement and must not be used as scapegoats to restore metal. If Morgan Chase has as much silver as Ted Butler believes, let them provide silver bullion for this purpose to the Department of Defense.**
