**---South African diamond trust organizer Cecil Rhodes, whose plans led to the founding of The Pilgrims Society in London in June 1902 and New York in January 1903. Douglas Dillon was a second generation member who chaired the Rockefeller Foundation and the anti-silver Brookings Institution in D.C. The Pilgrims Society has been uniquely focused on precious metals suppression as money and the commodity prices thereof as painstakingly chronicled in The Silver Stealers <http://silverstealers.net/tss.html>**

**Now we see Trump (“honorary” member of The Pilgrims and the Queen, “Royal” patron of The Pilgrims, who thinks an ounce of .9999 silver**

should be worth \$5 Canadian; \$5 was the limit on silver in the Crime of 1873) both happily together in tandem on the perverse matter of America becoming a [member](#) of the British Commonwealth, mocking the sacrifices of all the patriots who suffered and died during our Revolutionary War. Appeal will likely be made for such alleged necessity by pointing at the Russian-Chinese military alliance. The British never give up on retaking America and all the top power people here are in on it as in Bill Gates, Order of the British Empire. “Her Majesty has very large prerogatives in the matter of money” (1896 [document](#) released by the Silver Party, page 14). The British and apparently ourselves also, if unofficially, are soon to have a King and he will neither be a Rothschild nor be bossed by one, to the contrary of popular mythology that pulsates with vehement fervor as a cult religion all to itself that the Rothschilds own nearly everything. They are quite important but as titans of finance are

hardly alone on the world financial stage. Much hoopla has been made of Cecil Rhodes getting financing from the Rothschilds; however, he also got it from the Royal family, and in 1907 the great Cullinan Diamond, still the largest gem diamond ever found, was presented as a gift (maybe really a dividend) to King Edward VII, Royal Patron of The Pilgrims Society, on his 66<sup>th</sup> birthday.

One of the voices I like most in PM's is Steve St. Angelo. He has super graphics in his articles and has achieved his unique niche and isn't likely to lose his special limelight to anyone. Chris Duane is another stand alone singularity with his own "Simon Templar halo" as he's persuaded so many investors to hold silver ahead of the crowd and will be happy to have a money that is impervious to cyberspace failure, can't go broke, and stands all by itself the same as gold as to not needing any laughable "government guarantee."

**I have expressed disagreement with Steve and Chris on occasion when I saw facts compromised. I have to do it again inasmuch as facing reality should outweigh any other consideration. There is no popularity contest or personality competition to it. On April 4, 2017, Steve stated in an [interview](#) that when the government nationalized silver in 1934, they didn't do it "for deviant purposes." See the April 4, 2017 [interview](#) of SRS during minute 6:30 to 7:00. Very importantly, I have never in the**

**17 years I've written silver articles, nor in the few interviews I've had, ever, ever once suggested the government would "go door to door" looking for silver! That remark never came from me! Copy and paste all my articles onto a blank Word document and search for "door to door" and you won't find I ever wrote that we could expect that.**

**Steve went on to restate what was the official disclaimer line at that time that there was this emphasis from the Silver Purchase Act of June 1934 to get into the Treasury Department vaults, enough silver so as to be equal to 25% of the value of the gold there. It was also often stated to have been purposed for the understandable objective of having more silver for annual U.S. coinage issues at the Mints in Philadelphia, Denver and San Francisco. In subsequent interviews I addressed these and other issues and received a high percent of thumbs up votes. I hesitate to mention, but my**

interview had Skype acting up and it went to a mobile device without better audio quality and I was becoming sick and sounded the part, which in fact I went through some major illnesses in summer 2017. Not to digress on that but to say---beware---deficiencies of critical nutrients will lead you into serious issues. Among other problems I had serious heartburn attacks, and never took antacids, but discovered that zinc deficiency leads to heartburn. Just like the Silver [Stealers](#) steal silver from the world, so too does the medical colossus steal health from the public and prefers costly treatments at all times to cheap cures! Twelve MD's are in The Pilgrims NYC 2014 roster. The Silver Stealers and the Medical Colossus are of course dominantly owned by the same old-line dynastic families grown together more tightly than clusters of cypress roots in Louisiana swamplands. Now to get back on focus.

**Not to unduly hammer over the same territory, but for the benefit of those who missed those YouTube exchanges between EROI Steve and myself, I wish to briefly summarize. First, the silver taken under the Silver Purchase Act of June 1934 combined with President Roosevelt's executive order 6814 on August 9, 1934, was indeed, 100% absolutely and 100% certainly, taken "for deviant purposes." As far as achieving a claimed value ratio for silver of 25% to Treasury gold, what would have been the point besides disclaimer? As of 1933 Americans couldn't redeem dollars for hard gold coin. The silver cert program remained in effect till June 1968, but as of 1934 Treasury was hardly short of silver for redemption purposes. Wikipedia perversely states the silver certs came in response to "silver [agitation](#)." \$5 silver cert dated 1899---**

There wasn't much redemption being asked as the silver coinage we had remained in circulation. It wasn't touched by the silver nationalization---only bullion. Truly exhaustive particulars in 312 pages (and all free access) may be reviewed in my Summer 2009 release "Metals Confiscation Facts And Prospects" which is number 96 <http://nosilvernationalization.org/96.pdf> at No Silver Nationalization Dot Org, companion site to The Silver [Stealers](#) site. PDF #96, released in June 2009, was the first time in the PM community of

today the figure of 113,031,000 silver ounces was referenced as being taken in that event, which ended at the close of February 1937. Find it on page two! That was eight and a half years ago as this is released.

*What \$5,000,000 worth of silver looks like.—The minimum estimated accumulated stocks of silver in this country total 150,000,000 ounces, approximately fourteen times greater than that shown above; the maximum estimate of 250,000,000 ounces would make a pile approximately twenty-four times greater*

As of September 28, 1936, the Commercial & Financial Chronicle, a reference indispensable to serious financial historians, page 2045, reported that as of then, 112,995,247 fine ounces of silver had been surrendered, egged on by organized newspaper scare tactics boosting EO 6814 and the gold seizure EO 6102 of spring 1933. By February 1937 the silver figure culminated at 113,031,000 ounces.

Gold clause bonds, contracts and securities were of course squelched by FDR's tyrannical actions and the public was nuisanced additionally by a pesky 50% transfer tax on silver, which drove futures trading north to Montreal, Canada. On June 12,

**1963, trading in silver futures resumed in New York.**

**The New York Times front page, March 10, 1933, showed the typical witch hunting scare tactics used by newspapers, the Treasury and the Federal Reserve against Constitutionally lawful holders of precious metal money---**

**“Much of the gold returned by individuals yesterday came back intact in the bags and paper-**

rolled stacks in which it had been withdrawn, but nevertheless each coin was counted before the deposit slip was approved. **THE REPENTANT HOARDERS DISPLAYED A GOOD DEAL OF AGITATION, BUT THEY WERE RECEIVED COURTEOUSLY BY THE GUARDS OF THE RESERVE BANK AND CAME OUT WITH AN EVIDENT AIR OF RELIEF WHEN THEY HAD DISPOSED OF THEIR DANGEROUS TREASURE.**”

I am, as are many reading this, a “hoarder” (actually a “silver saver” rather than a hoarder or speculator) however I have no sense of being “repentant” about it since I feel no duty to commit financial suicide by sticking with Federal Reserve “dollars.” Sigh! My silver treasure, enough to crush me flat but yet a mere speck beside what Warren Buffett once held, I do not regard as a danger to my wellbeing. It’s appalling that a tiny cluster of elitists want to impoverish 99% of

**Americans! From a Treasury Department document dated January 31, 1934---**

## **HOARDERS OF SILVER**

**The April 30, 1934, page 14 New York Times mentioned that Senator Ellison Smith of South Carolina, “OBJECTED STRONGLY TO THE PUBLICATION OF THE LISTS OF SILVER HOARDERS.”**

**That was in response to the New York Times, April 26, 1934, page 17, which published some of Treasury’s list of “Hoarders of Silver” and showed such diverse interests as Paramount Cab Corporation, New York which held 100,001.85**

**silver ounces. By publishing such lists, the NYT was creating danger for those people. But if a fatality occurred due to their action, surely it would have only been what all who trust in silver deserve, according to the Banking Colossus and their “pets” in university economics departments.**

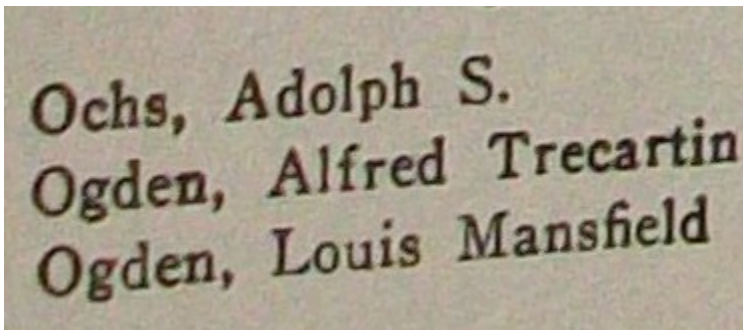

**A special to the N.Y. Times, April 25, 1934, page 4, listed some names of silver holders provided by the Treasury Department. It noted that J. ARON & CO. N.Y. was short 106 silver trading contracts. J. Aron & Co., at one time owned by Goldman Sachs, has often been cited as the organizer of the silver “leasing” business especially post the 1980 Hunt/Arab wipeout. However, the Lend-Lease Administration was doing it big time in World War Two and in fact, some leased silver did come back during the 1950s. The front page of that NYT edition reported that William Jennings Bryan Jr. of Los Angeles held four long contracts silver. He was the son of the great silverite of the 1890s---**

**Top spook honcho managing the New York Times,  
and approving of its editorial slant as of then was  
Adolph S. Ochs, who was in The Pilgrims New York

Frank Wisner, son of an organizer of the Central Intelligence Agency, was [Ambassador](#) to silver countries India and the Philippines; he’s a crony of anti-silver activist Paul Volcker (Pilgrims VP) and as of 2014 Wisner was on The Pilgrims New York executive committee and chairs the Arab Gulf States Institute and is or was a

**As far as needing silver bullion to maintain annual Treasury coinage programs, that claim was entirely farcical by every news media source that dutifully parroted it. There was no need for any heavy handed Federal use of eminent domain tactics or appeal to national emergency due to The Great Depression, which was entirely and intentionally caused by Roosevelt's British bosses dumping some 640MOZ silver out of British India, wrecking the buying power of silver and causing the Depression—absolutely NOT the Crash of 1929! (New York Times, October 9, 1931, page 16!) Franklin Delano Roosevelt's great grandfather,**

**Warren Delano (1779-1866), was big in the Chinese opium for silver “business,” having been blessed by the British with a slice of that pie---**

**Exhaustive proof is available free in The Silver Stealers as to the British attack against silver money causing the Great Depression, NOT the stock market crash in October 1929. Many lost their savings while retaining employment but it was the crippling of export industries to the Far East and India that threw millions out of work, due to the British crushing the purchasing power of silver! People don't look for that explanation today as we are more renown for importing from those areas. Some are outright lying about the**

Crash of 1929 causing the Depression; some repeat that evil fable due to idiotic attempts at being stylish. **"HUGE DECREASES IN THE WORLD'S TRADE ARE DUE TO THE DROP IN THE PRICE OF SILVER."**

---El Economista, Mexico City quoted in the New York Times, March 10, 1931, page 12.

Nothing needed to be done at Federal level about USA silver coinage programs other than to allow the time hallowed suggestion of opening the Mints to the free and unlimited coinage of silver! Holders of bullion could deliver it to one of the Mints and have it converted into lawful USA coinage for a nominal seigniorage fee. The British Mint Law of 1816, section 9, closed the English

mints to the private coinage of silver, but not to the private coinage of gold! Uncoincidentally that was at the close of the Napoleonic Wars. If the free market were permitted to function instead of being chronically obstructed by planned intent (not by accident and therefore yes, a multi-generational and multi-country **MONETARY CONSPIRACY** against silver, cemented by strategic marriages), all needs for silver coinage would have been met, and without any Federal trampling of citizens rights to own silver!

“Silver wasn’t taken for deviant purposes,” I also addressed that in my follow up rebuttal interview; these remarks summarize it. Shall we just accept at face value what government monetary sources tell us? Have they been caught in blatant and brazen lies in many instances, such as about inflation? It was 100% textbook deviant, this taking of silver from Americans. The few really top

**rate Presidents we had, especially Washington, Jackson, Van Buren and Tyler would have never approved. Regardless that the great majority of silver that went into the Treasury vaults subsequent to the Silver Purchase Act of June 19, 1934 and EO 6814 on August 9, 1934 following it, did come mainly from Chinese, Indian and Mexican silver (shipped from port of Veracruz) plus other sources, did not make it right that Americans were dispossessed under coercion and a hostile newspaper campaign, which of course extended also to flaming gold holders.**

**The reason in fact for the silver grab, and its goal of literally cramming and stuffing Treasury vaults with silver by the hundreds of millions of ounces per year for several years, was to vortex whirlpool history's biggest hoard of silver into Treasury vaults so the London/New York banking interests (The Pilgrims Society) would have this enormous**

**stockpile of silver they could tap on demand for several generations to come---to use for managing the world silver price and keep it subdued. I will not reiterate all I've ever said, as that would run into torturous length. Some highlights only will be stated. Other goals against silver were thereby accomplished, notably forcing China off its centuries old silver standard system, which was formalized as of November 3, 1935. That covered roughly a 400 year period since 1542 when Spain ramped up silver shipments from Mexico to the Far East. The malevolent impact of so many Chinese losing silver was that "A LARGE NUMBER OF CHINESE ARE FORCED TO LOOT TO LIVE."---**  
**Nevada Silver Senator Key Pittman, China Weekly Review (Shanghai), April 5, 1931, page 164.**

**On December 29, 2017, Steve [remarked](#)---**

**"The reason the United States and other countries stopped producing official silver coinage wasn't**

due to any monetary conspiracy; rather it was based on a straightforward problem; supply versus demand. Because industrial silver consumption had skyrocketed after World War 2, the silver market would have suffered deficits if the U.S. Treasury didn't sell silver into the market. It was quite simple; there just wasn't enough silver to go around. So, governments started to reduce, then eliminate silver from their coinage in the 1960's."

The "straightforward problem" was not mere supply and demand, as that could have been addressed simply by allowing silver prices to rise! "There just wasn't enough silver to go around," huh? Notice Steve left out to say "AT THOSE PRICES." Higher prices would have made adequate silver available to industry as well as to the lawful Constitutional coinage issues! That however would have been a huge embarrassment to the Federal Reserve dollar, as silver is historic money

**and allowing its purchasing power to trend upwards would have given Americans some protection against inflation! Strip the public of silver; you increase their exposure to the financially debilitating impact of paper currency inflation!**

**Did those who led the charge to remove silver from our money system understand the impact of such a policy? And if they did understand it would harm the public, is that not a case of a monetary conspiracy? Does anyone reading this think that execs of Eastman Kodak in New York State, execs of Du Pont in Delaware, execs of Dow Chemical in Michigan, and other Silver Users Association members in various states, weren't acting to influence their Congressmen and Senators to vote for the 1965 Coinage Act, and that these execs weren't drooling at the prospect of several hundred million ounces more of deeply discounted**

**silver? Their motive was good for them, bad for the soundness of America's money, ergo, a monetary conspiracy against silver from the industrial as well as the banking side!**

**Can we start by defining what a conspiracy is? I suggest it's simply any plan, in this case on a very large scale, on the part of a tiny percent of people, and of extraordinary and phenomenal power, that has some definite effect of harming the majority of the public. Did the Coinage Act of 1873 have the effect of harming the public? Was it a plan by a tiny few, who benefitted from its evil impact on the majority? The 1873 Coinage Act followed less**

than a generation on the heels of the savage catastrophe of the Civil War when people were still reeling from that conflict cataclysm. Southerners especially as the losing side, suffered most. The 1873 Act specified in law, signed by President Ulysses S. Grant, that silver coin couldn't be used to make payment exceeding five dollars (\$5) on any debt, and most monthly mortgages as of 1873 cost more than that! As a result of the collusion between gold mining kingpins like Collis P. Huntington and James Ben Ali Haggin---both California based---and the Senate, literally millions of already suffering Americans saw their homes and lands forfeited to gold only interests. While much has been made of the Bank of England's "traveling economist" Ernest Seyd playing a role in the 1873 sabotage of silver money, the Western gold mining magnates loomed far larger over this treason!

*James B. Haggin*

**Huntington and especially Haggin were researched in a nearly 300 page document I released in April 2017, “Silver Mining Kingpin Opposed Silver Money.”**

**<http://www.silvermarketnews.com/articles/MiningKingpinOpposedSilverMoney>**

**In 1870 President Grant’s diplomatic Minister to the United Kingdom became involved in a silver mine swindle in Utah in which Englishmen “out of the loop” were duped into buying shares in the depleted Emma Silver Mine. Monetary historian and Silver Party member Alexander Del [Mar](#) (1836-**

**1926) believed that Robert C. Schenck had a role in the “gold only” legislation leading to the Crime of ’73, and of course while in London Schenck was in grand position to get input from the British as to how to “bring down the Colonials,” the American middle class, by wrecking their money, which was silver! Does anyone else hear some echo “wasn’t due to any monetary conspiracy?” When do we stop letting evil men off the hook for answering for their crimes against the megamillions by denying there was or is no monetary conspiracy against silver in any particular phase of silver history, as 1960 to 1965? Del Mar, who was mining adviser to the U.S. Monetary Commission of 1876, complained about shady banking practices---**

# STORY OF THE GOLD GONSPIRACY

AS TOLD AT

The Memphis Convention

BY THE

HON. ALEX DEL MAR

DELEGATE FROM CALIFORNIA, JUNE 13, 1895

See end for quotations from that convention. Del Mar believed the main input for the 1873 silver

demonetization came from Europe and England. My research on James B. Haggin and his stratospheric California associates including his brother in law Lloyd Tevis, strongly counters that to the contrary, these Californians were the main input. I'm stunned that Del Mar didn't even mention Haggin, Huntington and Darius Mills in his speech! Regardless a gold only "community of interest" existed on a transatlantic basis and collaborated to impose the poverty and land dispossession cataclysm on many nations by attacking silver. John **TEVIS** Lane is in The Pilgrims NYC 2014 roster!

In 1899 one of Alexander Del Mar's worthwhile books, "A History of Monetary [Crimes](#)" was written. Google the phrase "criminal conspiracy" and yes indeed you will find a true plethora of results! Doesn't monetary greed for wealth concentration lead to monetary crimes, and ERGO,

motive for organized monetary conspiracies against the public? **Wake up and smell the coffee already.** The financial sphere is riddled with conspiracies more than any Swiss cheese with holes and crevices. It's been so since before the time of Roman financier and General Marcus Licinius Crassus, the grim evildoer brilliantly portrayed in the [1960](#) epic "Spartacus."

Page 8---

**The evil work was then carried to other countries especially to the United States of America, where in 1873 it was copied with a faithfulness to its model that could only have been born of design.**

**If a “design” by an elite select few harms most of society, again, is that not a conspiracy, and in these cases, monetary conspiracies? If the silver suppression by megabanks isn’t a crime, then no one stands guilty and there is no need of punishment past the token fines levied against such banks as a bogus palliative to public rage.**

**Both the Huntington and Haggin fortunes achieved representation in The Pilgrims Society, the central committee of monetary metals price management since June 1902. Haggin’s great grandson is a current member and inherited an unknown number of billions in labyrinthine trusts from his ancestor, who was known as “the greatest mine owner on earth.” The Huntington railroad, land and gold mining fortune, also in such murky trusts, is run by the current president of The Pilgrims New York branch Miner Hill Warner (Episcopalian),**

member of the Mayflower Society and descended from towering Colonial giants and their land grab fortunes including William Bradford and John Warner of Massachusetts Bay and Connecticut Colonies. Warner runs Public Assets International and has some connection to a \$650 [billion](#) Saudi Arabian development deal and his wealthy brother in law was a member and inherited fortunes from banking, steel, copper, textiles, transportation and the old “Ice Trust” that gouged so many middle class New Yorkers in summertime over a century ago.

Warner assisted [NKNK](#), Russia’s largest petrochemical complex.

**The September 28, 1935 Commercial & Financial Chronicle, page 2045 (yes, page 2045 again, coincidence only), featured this from a spokesman of the American Mining Congress meeting in Chicago, which as of then hadn't yet been totally "penetrated" and taken over---**

Why should not the Government pay a higher price for silver, which helps lead, copper and zinc mines, as well as silver mines, in order to offer work, in order to support mining communities, in order to prevent all the evils which come from a lessening of our mining activity? Careful consideration of this subject should convince any reasonable man that the present price, and even a higher price, for United States newly mined silver is fully justified.

*More Silver Must Be Coined*

In conclusion, perhaps a few words as to the long run prospect of silver is in order. Should the Treasury Department retain its present policy in regard to the purchase of foreign silver and its present policy in regard to the purchase of United States silver, we can, unless unexpected conditions arise, reasonably anticipate pretty steady price levels for silver for the next several years. But the long run status of silver will be dependent upon its enlarged use as money when world monetary systems are stabilized. The experience of the last few years has demonstrated that the quantity of gold is insufficient to re-establish it as the only monetary metal, not to mention the serious problems connected with the maldistribution of such stores of gold as are already in existence. The present tendency of probability is increasingly towards a greater use of silver for monetary purposes.

---

**It's absolutely true as Steve noted that industrial silver use soared especially post World War II. But the coinage programs could have been continued regardless as suggested by anti-establishment economist Elgin Groseclose, famous in the 1960s for advocating continuation of silver coins. His suggestion? We would have started by doubling the face value of existing silver coins for purchases. Dimes would be accounted as twenty cents, quarters as fifty cents, halves as dollars, dollars as two dollars. To be practical, nominal values would have needed revision on newly minted issues especially a la Hugo Salinas Price of NOT stamping a nominal value on coin; it would have worked but for Treasury dumping silver for price capping.**

**The Groseclose suggestion went over like a lead balloon as the entire USA/British and European money powers had long aimed at ending silver use as money. That was evidenced in the ending of emphasis on silver in what was called the Latin Monetary Union just after the USA Civil War---major European states started de-emphasizing silver coinage. That was another shattering shock wave caused by The Crime of '73. It affected the planet! Not just America! In China and India, it flummoxed trade and starved entire provinces, with a death toll of an unknown number of millions! (New York Times, February 3, 1931, page**

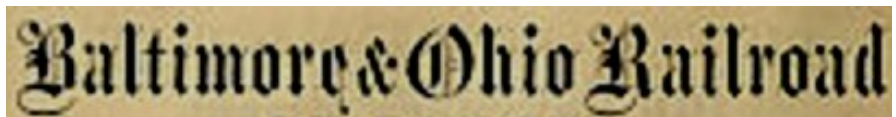

**24, “Silver As A World Problem” by John Brisben Walker.) Reason being, the 1873 Act was a severe blow to Chinese foreign trade, regardless that silver Trade Dollars remained available. Walker reported---**

**“As if they had been a row of bricks, banks all over the United States fell down. Immediately those who had been living from hand to mouth, began a struggle for existence. Depredations occurred. I personally saw a procession of starving workmen---estimated to be 10,000 in number---tramping along the Chesapeake and Ohio Canal begging for food, ready to work for a wage that would barely keep body and soul together. There were four batteries of artillery sent down from**

Washington to protect the houses and property of the Baltimore & Ohio Railway. *MEN COMMITTED SUICIDE BY THE THOUSAND.* Everywhere hopelessness and despair settled over the country. Pressure was exerted by banks upon all who refused to accept England's single gold standard. The effect on India and China will never be known in their fullest horror. The immediate depreciation of their only stock of money, silver, stopped trade and starved whole provinces. *IT CAUSED MILLIONS OF DEATHS.*"

Walker died five months after his published article favoring silver money.

The logo for the Baltimore & Ohio Railroad, featuring the text "Baltimore & Ohio Railroad" in a stylized, gothic-style font on a light brown background.

Does that 1873 Act not appear to have been a monetary conspiracy against silver? And those who orchestrated the sinister legislation just had no idea it would rip middle class finances apart like

**an F-5 tornado? Wealthy persons who happened to be long silver were also wiped out. Those were “nonmembers” of course, nonparticipants in these shady plans.**

**The heavily cross-intermarried moneyed dynasties of America, England and Europe would have no part of allowing the value of silver to rise. Their thundering Mongol horse to ride was created “money,” not hard silver. By this tactic of political sabotage, sponsorship of some legislators and**

**bribery of others they prevented nations from Mexico on down through South America from becoming free from the London/New York banking colossus and made Americans progressively less prosperous, with more millions forced into apartment residency.**

**By discontinuing silver as money, the price managers were able---by collusive conspiracy---to maintain a barbaric price cap regime over silver now for more than half a century post the silver coinage culmination in 1964. A major mining company not long ago mined out the Pirquitas silver site in Argentina at trash prices! For the purchasing power of silver to rise would have been an intolerable blow to fiat currency! They want the public on artificial and inflatable “money,” so as to continue lowering standard of living for most Americans. Lower living standards are in keeping with medieval feudalism under Royalty and nobility, and The Pilgrims Society is sponsored by the British Royal family, who I don’t hesitate to say are easily wealthier than any other family in entire planetary history and are happy to have the**

**Rothschilds taking most of the blame. Another name mentioned before is Haggin, who masterfully tap danced all over the Rothschilds in five out of five rounds in the world copper market in the 1890s as documented from original sources in “Silver Mining Kingpin Opposed Silver Money” and Haggin was another Episcopalian, known in England as the Anglican Church of England, led by the Royal family. One of Haggin’s minor deeds was to intentionally cause 16,000 head of cattle owned by a competitor to die of thirst by his seizing control over the Kern River. Plus he owned three times more racehorses than anyone else on the planet and a million plus acres in Mexico.**

**Haggin** was a rarity amongst the business community on the West coast. A tough and shrewd financier, it was said that he had never failed in a venture.

**Haggin held the dominant interest in 160 mines stretching all the way to Korea and including South Dakota's Homestake Gold Mine and the Anaconda Copper Mine in Montana and Cerro De Pasco (Peru) Copper Mines; he was enriched astronomically by the use of copper in the new electrical boom! Haggin was in The Pilgrims leaked 1907 roster---he also played a lead role through Knickerbocker Trust Company in the Panic of 1907 leading to the Federal Reserve Act! Just no, no, and no people! It is no way only Pilgrims dynasties Rothschilds and Rockefellers controlling the financial sphere! There is no need to discount the monetary conspiracy against silver, curated principally in English hands since Sir Francis Drake started seizing silver from Spanish vessels on the high seas in AD 1572. If Morgan Chase has that much silver, only two intentions are possible on its part. One, it will use the silver for more price suppression as defending the Federal Reserve petrodollar is more important to JPMC than other considerations. Back in the days of Chase National Bank, J.P. Morgan & Company, Equitable Trust Company of New York, Bank of Manhattan, Chemical Bank and the other

forerunners of the present JPMC, these entities were always acting against silver as money and commodity price increases for silver. Or the other possible intention, the families back of JPMC and the FED realized that eventually being short silver would lead to their incineration, and finally looked long in the future when silver would dramatically narrow its ratio to gold.

However, in October 2013 Silver Market News Online appears to have been the only alt news source willing to post “Jonathan Frid Vomits On Silver,” Frid being the name of the vampire in the old “Dark Shadows” TV series and I likened Christian to Frid and in fact there was much semblance re hairstyle and expression. I delved into Jeff’s Pilgrims Society connections. Unlike the exchange with Steve, Mister Christian never cared to make any whisper about that autumn 2013 release. It’s been available for more than 50 months as I write this and he’s had ample time to have had someone mention it to him---(see start page at [www.silverstealers.net](http://www.silverstealers.net), click on text box) --- On January 26, 2012, Sir Robert Worcester of The Pilgrims London acknowledged my work, yes, in a [dismal](#) way; if they know, so does Jeff Christian.
