

HAVE YOU SEEN THIS MAN?

Submitted by Charles Savoie "Silverwriter" December 2004

Seen posing as a nice guy (Jewelers Circular Keystone, July 1998, page 82.)

Is Walter just an example of nature's capriciousness? Should we place an olive wreath on his head and send him around the coliseum in a chariot? Should he be awarded the Sovereign & Exalted Order of the Obsequious Dithyramb With Celestial Crown & Bejeweled Slave Maidens? Or should we ask him why silver miners and silver savers aren't entitled to profit from silver while SUA profits? We want to know why a users association exists in silver whereas none exists in any other commodity! Walter, give us BACK our strategic silver stockpile! We need it for national defense much more than Tiffany & Company needs it for overpriced jewelry! Give us BACK our Constitutionally based circulating silver coins that you got from the Federal Reserve branch banks starting in 1965, and from Treasury "auctions" (giveaways, 1967-1970)! And return all leased silver from overseas! Do not settle lease contracts in cash; paper is no substitute for physical metal (cellulose fibers lack the scientific versatility of silver!) "Walter Frankland Jr., executive director of the Silver Users Association, criticized advisory services that have promoted the buying of silver in the last three years." September 29,

1970, page 67 (NYT) "Mr. Frankland rarely forecasts higher prices." (Wall Street Journal, April 27, 1979, page 34). "I am dismayed at the way certain individuals are acting in this market," says Walter Frankland." (WSJ, October 26, 1979, page 48).

Fellow silverites and goldbugs, a review of the Congressional Quarterly Almanac (available at larger libraries) for the years 1956 through 1967, covering the years 1955 through 1966, shows that the Silver Users Association had lobby related expenditures of only \$194,072.09 for that entire period! Just \$16,172.67 per annum! It's incredible the return they got on their "investment," accessing megamillions of ounces of silver at public expense! We need to form our own precious metals lobby and all contribute a mere one-tenth to one-quarter of one percent of our individual net worth and we'll be off and running. It would be a case of by giving something, we actually get back more, since the worth of our assets would be increased by objectives such as remonetization of precious metals. In the 1830's, bank stock was exempted from taxation in New York State. We should therefore press Congress for total tax exemption on mining shares and physical metals and numismatics. Let the gold and silver mining companies become the "monetary agencies" displacing the Federal Ripoff Reserve! Take up the banner of President Jackson against the central bank! Let me not be viewed as sounding a discordant note; however, we need a summit conference of the biggest names in gold and silver, to form the political action lobby we need. We need this 100 times more than another humdrum investment conference. Where will I be? Doing what I can to find and present facts to you the metals investors.

Frankland sez, our silver's worth one corncob!
Users always trying to do a hatchet job!
Try to take our silver, face a lynch mob!
Big vein in user's head starts to throb!

Silver users say, people who hoard silver are really bad!
But look at silver users crimes---stark raving mad!
No more silver stockpile---America you've been had!
They want you to think silver money was just a fad!

The Silver Users Association, a gargantuan colostomy bag!
They need a horned devil symbol to use as a flag!
Let it read "opium" and "poison gas" on their name tag!
Let all their scandals be broadcast, tongues will wag!

HSBC Bank, member Silver Users Association,
Abusing millions of Chinese isn't an aberration!
This user's association has a notorious concentration,
Of companies who cause widespread desperation!

Wall Street Journal, November 9, 1970, page 23---"Without
Government offerings, silver users will have to contend with
uncertain supplies."

Let Frankland get the silver his association needs from Alan
Greenspan. Let Rumsfeld get the silver he needs for military
equipment from either of them, and let David Kass of CFTC
explain how the necessary supplies may be mined from his
COT report. Let SUA mine their own silver for \$4.50/ounce.

Edward O. Leech, director of the United States Mint, writing
in The North American Review, February 1891, page 310,
commented---

"Commercial nations may find it to their advantage to join
the United States in the remonetization of silver."

Elizur Wright, writing in The North American Review, May
1877, page 431, said---

"The more gold is in the hands of the people when notes fail
and credit collapses, the better for the people certainly."

Silver is money, Frankland! Greenspan, gold is money! Let SUA, CFTC and the FED be audited and dissolved! Bring on the Precious Metals lobby!

In his 1985 film, "The Evil That Men Do," a conversation took place between some undesirable characters (let's say Frankland and Greenspan) and Charles Bronson---

"You've got what we want, we'll pay! Now let's talk about a more reasonable price!"

"Well you know I was thinking, I'd like to have a Mercedes, and a ranch in Malibu, and maybe a hairdresser place up there in Aspen, you know what I mean?"

"My client's willing to go \$200 grand, tops!"

WHAT? You expect me to rent?"

Which brings us to the final quotation for this brief report---

The Commercial & Financial Chronicle, June 10, 1965, page 2427, quoted Idaho Congressman Compton I. White Jr. in a speech to the Colorado Mining Association---

"I would say that no matter what happens with regard to silver coinage legislation, **silver miners are going to enjoy unprecedented prosperity.**"

This isn't 1965 any more, Frankland. No more overseas silver to lease, huh? Not much left besides COMEX inventory. Federal Reserve "notes" aren't wealth, Greenspan. Some silver dimes are selling for over 15,000 times face value. Wouldn't it be a hoot to see the common date ones reach that ratio!
