

THE CROSSHAIR SCENE

Presented November 2009 by Charles Savoie

“The big boys, the really big boys, are certain individuals from international financial power blocks such as the Rockefeller; J.P. Morgan; and allied groups such as the Rothschilds and Warburgs. As a cooperating group, they exert control over the news media, major universities, giant foundations, both major parties at the national level, government agencies, and business and financial organizations.

Everyone more or less knows that, but what few realize is that they have also controlled and often even created the major socialistic or collectivistic movements; and too few persons understand the most important fact that ***THEIR GIANT FORTUNES HAVE BEEN CREATED, INCREASED AND PERPETUATED THROUGH THEIR CONTROL OF GOVERNMENT POLICIES. THROUGHOUT THIS CENTURY, THERE HAVE BEEN WARS, REVOLUTIONS, INFLATIONS, AND DEPRESSION; AND WHILE THE PEOPLE AS A WHOLE, INCLUDING MANY WEALTHY PERSONS, SUFFERED TERRIBLY, THEY THEMSELVES ALWAYS PROFITED ENORMOUSLY WHILE THEY OR THEIR AGENTS CONTROLLED THE***

GOVERNMENT'S POLICIES THAT CAUSED THESE DISASTERS. ---“The Wallace Contract and the Watergate Connection” by Si Ross, page 120, The Jed Morse Press, Dallas, 1974

I cite the above passage from an autographed copy of that magnificent piece of investigative research, received in a personal consultation with the author at his Dallas home over 35 years ago. I arrived early on a Thursday morning and left at 4AM the next day. Jed Morse was a patriot from Revolutionary War times about which little information seems available on the web.

I want to present a fairly brief offering for November. This is Thanksgiving month. Unless we are very active in fighting for our liberties, we can in future years forget about Thanksgiving. By very active my meaning is---totally give up following all professional sports on television and in all other media. Don't follow collegiate or high school sports either. No computer games. Very little relaxation time. Instead, lobby Congress and everyone you can think of. Fight for the Constitution and the Bill of Rights. Fight the Obama agenda including his intention this December to sign the United Nations Climate Change Treaty, with its apparent adverse implications for our sovereignty! In all honesty, I was very surprised to see John McCain as a sponsor of the Senate bill to audit the Fed. But it seems at Presidential level, a group of shadowy figures back of the shutters always insures he will do their bidding. Call them Bilderberg if you're comfortable with that. I know them by another name---The Pilgrims Society of the United States and Great Britain. I won't go into any description of them here. I did that several years ago. The series was referenced all over the Internet. I remain the sole commentator on metals to have turned on the lights concerning this group of financiers, and why they easily outrank all other similar organizations.

Regardless of what happens on the world stage concerning the decline of American power overseas, we must remain gravely concerned about our status here, and that of our posterity. This shadow group who always seems to be back of every President has intentions for metals investors. They intend that all metals investors---themselves excepted---will be totally stripped of every vestige of wealth. Their nature is such that they so despise competition, they will stop at nothing to prevent the formation of capital outside their influence. That doesn't mean outside their membership; it means, outside the influence of their Society;

less elite groups such as the Council on Foreign Relations. On both sides of the Atlantic they have the most amazing and extensive genealogies spanning back centuries to Medieval Feudalism. In Feudalism, the nobles owned and controlled everything and ruled over serfs with fighting knights. Most knights were in the service of greedy, power crazy lords and royalty. This is the condition they seek to return us to. Accordingly, in the wake of the drive to audit the Federal Reserve, and its necessary aftermath, the abolition of the Fed and the start of return to a better money system, we must force Congressional probes into all known internationalist organizations, not only the most visible one, the Council on Foreign Relations. These people view free markets the way you think of having rats in your infant's crib. Obama's wish to strengthen the Fed signals he'll veto any measure to audit it. His veto being overridden and the Fed's filthy secrets laid bare, Obama should be impeached and removed from office, then get rid of Du Pont agent Biden!

Their rationale for nationalizing silver will be simpler than for that of nationalizing gold. I need not be psychic to sniff that Obama wants to outdo Franklin Roosevelt in screwing the living hell out of us! They will simply say look---Iran, North Korea and others are renegade states, and we have to have strategic war materials in our armamentarium. This includes silver, of which the Government currently has none left. The fact that the Silver Users Association absconded with it will not be mentioned in any Executive Order! I being one of only two commentators on

the long side of silver---The Great Ted Butler is the other one---to have ever been quoted by the Silver Users Association, am confident they assigned a committee to monitor what many silver bulls are saying. I have warned the silver users that if nationalization takes place, we will organize consumer boycotts to run their companies into the ground. Actually, that should be enough to convince them to lobby Washington to not stage a nationalization (confiscation). They are hardly afraid of me; they are afraid of all of us collectively. However, the Money Power itself is another matter. They are not worried what we might do to stop buying Dow Chemical products. They are out to rob us of all capital we will be able to form should we remain in possession of our metals. New chemical companies would arise if Du Pont & Dow failed due to consumer boycott. For this reason we must press this advantage with the Federal Reserve audit, and force Congress to proceed with other appropriate investigations to follow. The Fed is step one; the other probes are necessary and in no way tangential. If successful, these audits and investigations will constitute the best possible defense for our property rights!

Republican Senator Bob Corker of Tennessee is a recipient of contributions from Vanderbilt University and his colleague in distortion, Democrat Senator Jeff Merkley of Oregon receives campaign funds from the Council for a Livable World, on whose national advisory board sits Gerald Warburg. These Senators are sponsors of S. 1803, the dubiously named Federal Reserve Accountability Act. It's intended as a substitute to the real movement to corner the Federal Reserve. They should be hounded from office in disgrace. Because of the Fed, more Americans than ever before are apartment dwellers (feudalism) and it takes both married adults to keep a household afloat.

The lengthy parade of price lowering and price capping actions against precious metals needs to be laid bare in the sense that the central source has been for over a century The Pilgrims Society. Warren Randolph Burgess of The Pilgrims and the Federal Reserve Bank of New York, in a speech to the Vanderbilt sponsored American Economic Association, advocated lowering the price of silver (Commercial & Financial Chronicle, January 1, 1938, page 45). The AEA is primarily university economics professors prostituted to the funny money "industry." These paperite hyenas would have laughed till their ice tea dribbled out of their nostrils if they could have known that in August 2000, Sunshine

Mining would declare bankruptcy caused by unendingly hypershorted COMEX silver quotes.

As the economist wipes the pus from his eyes, we look at him, and he's covered with flies!

He stands in supreme disgrace, lying for bankers all over the place!

On October 24, 2009, President "FDR" Obama declared a state of national emergency regarding the swine flu, giving the Secretary of Health & Human Services sweeping powers. Most silver investors are aware of silver's anti-microbial attributes. That, added to the zero stockpile situation, is the perfect rationale for another national emergency so he can "call in" people's silver! The date to be determined by the Executive Committee of The Pilgrims Society of the United States, the Wall Street gang that has wrecked the middle class and won't be satisfied until full serfdom and feudalism is achieved. As Congress keeps the pressure on for the Fed to be audited, and the voters insist their representatives to follow through, the risk of outbreak of war with Iran increases, because the Money Power will stop at nothing to hide their secrets behind shrouds at the Fed. The racketeers on "The Untouchables," TV series of early 1960's starring Robert Stack, were microbes compared to the elephants we're talking about. At <http://citypaper.net/articles/062295/article023.shtml?print=1> you find some elucidation as to the exploitation of the nearly 3.3 million square mile territory of Brazil by Nelson Rockefeller (Pilgrims Society) assisted by the United States Government. He chaired the President's Advisory Committee on Government Organization from 1953-1958 and chaired the Government Affairs Foundation in the same period (Who's Who, 1971, page 1924).

Let's briefly address the matter of prospective nationalization by foreign governments of mining company mineral sites. Sean Rakhimov had an insightful essay on the subject in September. As of October 1, Mexico announced it's considering a 4% mining tax. The camel's nose is now in the tent! As of this month, Mexico has slapped a 2% levy on dollars coming into its territory. The shadow figures in the United States could be involved in orchestration of foreign takeovers, or not; in either case, we are dispossessed. I strongly urge you to not sit on your hands! As another Congressional action following on the heels of the Fed audit, we must have Congress send a message to other governments---"do not

nationalize!” The Canadian government should do likewise. It won’t solve the whole issue, but it would be a step. The United States has taken in who knows how many millions of legal and illegal Mexican immigrants. Most mining shareholders in Mexican concerns are USA citizens. This is therefore no way for Mexico to repay the USA for taking in so many millions of its low income people! ***Any campaign to encourage influential residents of the major silver producing countries to buy shares in “Vancouver Gold & Silver Luminaries” would tend to ward off higher royalties.*** This need not disadvantage the common man, as with capital formation comes jobs in many sectors. Private enterprise is almost always more efficient than government bureaucrats. Also, if foreign states see we are serious about reforming financial corruption here, it could make them take a step back from nationalization plans. But be ready in any case to transfer from one asset class to others! Water investments should be considered. If the United States Government were to dispossess metals from its citizens once again, the only hard assets left are things jewelers deal in. And gems are very problematic to acquire and liquidate, since they are not fungible.

<http://news.goldseek.com/GoldenJackass/1254464100.php> makes mention of martial law and 200 Federally operated detention centers for destitute Americans. We didn’t have to be heading into this whirlpool. National monetary policies have been fixed at the wrong settings for generations, the planners knowing that by continually creating rot in the system they would ultimately impoverish most Americans. It seems questionable that we will transit the Obama years without a declaration of national emergency, under which our remaining rights are to be torched. One of many instances supporting the contention by Si Ross that the big rich have used government to increase their fortunes while others have lower living standards imposed on them as a consequence was detailed by William Hoffman in “Paul Mellon---Portrait of an Oil Baron,” 1974, pages 47, 49-50 and 52---

“The Harding and Coolidge administrations might better have been called the Mellon administration. “For eight years,” wrote Drew Pearson, “he dominated the national capital. For eight years his word was law with every banker throughout the land. For eight years Presidents served under him. So powerful was his influence, so great his prestige that ***HE TOLD THEM WHAT TO DO AND HIS JUDGMENT WAS FINAL.***”

(In the series “Britain Against Silver” I documented how President Hoover, elected in 1929, refused to call an international conference on silver. Mellon was Treasury Secretary into 1932, and had a strong association with English royalty, as seen in “The Pilgrims of Great Britain,” 2002. In “The Greatest Right,” I documented Britain’s purpose of devaluing silver throughout the world!)

“The Depression came, the greatest depression this country ever experienced. It bothered Andrew Mellon not at all. It merely presented him with another opportunity to swallow up weaker corporations and when it was over, to emerge stronger than ever. With Pennsylvanians ***STARVING AND FREEZING IN THE STREETS*** in the winter of 1931, Governor Gifford Pinchot visited Andrew Mellon at his Washington office. Before being allowed to see the Treasury Secretary, the Governor admired the \$1.7 million of gems Andrew Mellon recently purchased from the Soviet Union.”

“Representative Patman went on to make the remarkable statement that “Mr. Mellon has violated more laws, caused more suffering ***AND ILLEGALLY ACQUIRED MORE PROPERTY TO SATISFY HIS PERSONAL GREED THAN ANY OTHER PERSON ON EARTH.***”

(Mellon typified the concept of “the seizure of the wealth necessary” that is the hallmark of The Pilgrims Society, American Review of Reviews, New York, May 1902, pages 557-559)

“Representative Patman also revealed that Andrew Mellon, while in office, had voting stock in **MORE THAN THREE HUNDRED CORPORATIONS** engaged in mining properties, aluminum, magnesium, carbon electrodes, sales, railroads, Pullman cars, gas, electric light, steel railways, copper, glass, brass, steel, tar, banking, locomotives, water power, steamships, ship building, oil, coke, coal, and many other different industries.”

(Mellon resigned from 51 boards upon becoming Treasury Secretary. That was exactly the same number of boards on which sat his fellow Pilgrims Society member, Percy Avery Rockefeller; and were on several boards together. According to the 1931 Who’s Who, page 1542, Mellon was also director of the U.S. Railroad Administration and was chairman “ex-officio” of the Federal Reserve Board and literal owner of Gulf Oil, Alcoa and other entities).

We have to stop the Lordly Ones from ruining us and reverting us to serfdom. They must be fully exposed, probed, and investigated by Congress. The ties binding us to Great Britain, home of central banking, must be broken for once and for all time! As long as they are allowed to continue functioning in the dark, we remain in grave danger. Did you hear about Obama’s confidence in his senior advisor, Paul Volcker? Yes, Volcker is a vice president of The Pilgrims of the United States, and is one of David Rockefeller’s top agents. A recent New York Times article on Volcker’s alleged lack of influence with Obama is typical misdirection. Volcker broke the Hunts out of 59 million ounces of silver by 1986 after having arranged a false bailout for the Hunts earlier while at the helm of the Fed. None of us has remotely close to 59MOZ but be assured they intend to break us all out of whatever we are holding---one way or another. This is why we have to expose them. This is why Senator Jay Rockefeller wants the President to have “emergency” powers to shut down the Internet. We have to make Congress investigate them and sanction these Crown collaborators out of everything they own, because most, if not all of it, is ill-gotten gains; and they have to be legislated into illegal status as disloyal. If we don’t impoverish them they will do it to us! The chain of command could be---David Rockefeller to Paul Volcker---Paul

Volcker to puppet President Obama. David Rockefeller can ruin us all by himself, just like he undoubtedly ordered Volcker to smash the Hunts! As biographer William Hoffman said in "David---Report On A Rockefeller" (1973) ---

“One President after another has done his bidding.”

***LET ALL THE LITTLE PEOPLE SINK INTO DESPAIR; WE'RE THE
WORLD'S BANKERS—YOU'RE IN OUR CROSSHAIR!***

At age 94 it matters little how much longer he lasts; his decease will alter nothing. Rocky is among the Inner Circle of Pilgrims Society members along with the Rothschilds, Mellons, Astors, Windsors, Vanderbilts and others, the other members being advisors and top level functionaries serving as Ambassadors, Admirals, Generals, corporation chairmen and directors, foundation and university trustees et al. They intend to dispossess us of all property rights. Our intentions

for them must be to make Congress put an end to their activities forever. I also see much supported opinion on the web concerning references to “useless eaters,” the view of the top elite towards the poor and middle classes. The nonaligned rich like Charles Goodyear, Jack Northrop, Howard Hughes, the Hunt brothers and the flaky Cullen Davis types are routinely smashed by collusive actions uniting government agencies, courts, bank consortiums and commodity and securities exchanges with extensive bag of dirty tricks including naked shorting. The long list should not be forgotten, of inventors and competitors throttled by the Mellons, Rockefellers, Vanderbilts, DuPonts, JP Morgan and other looters of The Society. Working with and supporting the Ron Paul agenda for Constitutional rights is the best thing any of us can do to shield our metals investments and move America back in the direction intended by the Founding Fathers---

<http://www.ronpaul.com/on-the-issues/audit-the-federal-reserve-hr-1207/>

Here's what inaction gets us for our country---

“IT LOOKS JUST LIKE A MORGUE! AND WATCH OUT, IT COULD BE ONE SO EASILY!”

---Mexican bandit in “A Fist Full of Dollars” (1965)
